

DocuSignCredential – Credential Webservice Client (Apache Axis)

This project is the library for using the Credential webservice with Java. All webservice operations can be executed using this JAR.

Building

1. Run **ant jar** from the project root.
2. Locate the created JAR at **DocuSignCredential/build/docusign-credential-3.0.jar**.

Running Unit Tests

1. **(optional)** Change `docusign.credential.webservice.endpoint` in **DocuSignCredential/test/config.properties** in order to change the webservice endpoint URL. If not modified the following default URL is provided:
`https://demo.docusign.net/api/3.0/Credential.asmx`
2. Run your unit tests using JUnit 3.
