

DocuSignWS – Webservice Client (Apache Axis)

This project is the library for using the DocuSign webservice with Java. All webservice operations can be executed using this JAR.

Building

1. Run **ant jar** from the project root.
2. Locate the created JAR at **DocuSignWS/build/DocuSignWS.jar**.

Running Unit Tests

1. Set the following properties in **DocuSignWS/test/config.properties**:
 - **[REPLACE WITH DOCUSIGN INTEGRATORS KEY]**
 - **[REPLACE WITH DOCUSIGN ACCOUNT ID]**
 - **[REPLACE WITH DOCUSIGN PASSWORD]**
 - **[REPLACE WITH EMAIL ADDRESS]**
2. **(optional)** Change `webservice.endpoint` in **DocuSignWS/test/config.properties** in order to change the webservice endpoint URL. If not modified the following default URL is provided: **<https://demo.docusign.net/api/3.0/api.asmx>**
3. Run your unit tests using JUnit 3.
