DocusignWS3_0 – Webservice Client (Apache CXF)

This project is the library for using the Docusign webservice with Java. All webservice operations can be executed using this JAR.

Building

1. Run `ant jar` from the project root.
2. Locate the created JAR at **DocusignWS3_0/build/docusign-wsapi-3.0.jar**.

Running Unit Tests

1. Set the following properties in **DocusignWS3_0/test/config.properties**:
   - **[REPLACE WITH DOCUSIGN INTEGRATORS KEY]**
   - **[REPLACE WITH DOCUSIGN ACCOUNT ID]**
   - **[REPLACE WITH DOCUSIGN PASSWORD]**
   - **[REPLACE WITH EMAIL ADDRESS]**
2. **(optional)** Change `docusign.webservice.endpoint` in **DocusignWS3_0/test/config.properties** in order to change the webservice endpoint URL. If not modified the following default URL is provided: **https://demo.docusign.net/api/3.0/api.asmx**
3. Run your unit tests using JUnit 3.
